

California Women's List Our Updated Mission, Vision, and Values

Since our founding in 2015, we've prided ourselves on evolving with the times and innovating new ways to support candidates, while keeping our goal of electing women leaders into office in California intact. With our history in mind, we have worked to refresh the statements around our mission, who we are, what we do, and our values.

California Women's List's mission is to elect women who will make California more just and equitable for all.

- We endorse, fundraise for, and elect women to public office in California.
- We engage a robust network of donors to actively support our endorsed candidates.
- We energize the next generation of women donors to make their voices heard.

Our Values:

- We support candidates who champion policies that dismantle systems of oppression.
- We seek the perspectives of individuals from diverse cultures and identities, acknowledge and learn from the histories of communities of color, the LGBTQ+ movement, and more.
- We are an intersectional feminist organization. All issues are women's issues; we also continue to advance reproductive rights, equal pay, and equitable representation.

We are a Political Action Committee that endorses, fundraises for, and elects women to public office in California. Our volunteer board runs the organization and each board member is committed to the mission and values of CWL.

California Women's List looks forward to continuing to grow, change, and most importantly elect more women, as we look towards the future.

If you have any questions, please contact us at info@cawomenslist.org.
